"The democrats of Alexandria elected Mr. J.

T. Beckham to the position of Mayor by an overwhelming majority at the last election. This majority should be peculiarly gratifying not only to the democrats of Alexandria, but to Mr. Beckham and his numerous frieds in this and Culpeper county. The Woodlawn Farmers' Club.

The June meeting was held at the handsome residence of Col. J. M. Lewis, 'Benvenue," near Gunsten, on the Potemae, on the 11th iast. A. W. Harrison, chairman.

The minutes of the last meeting were read and approved, and a discussion followed on the use of manures and fertilizers, in which it seemed to be the opicion of seme, that where a person had a limited amount of stable manure, it would be better to spread it over a large surface and supplement it with some concentrated manure, rather than to put the stable manuro heavily on ics; land and use the concentrated manures separately on the rest. Col Lewis has rursued the plan of plowing down green crops with evident advantage. His soil is mostly of a light character and he thinks it needs vegetable matter, and the quantity is of more importance than the quality. He has

been very successful with olavar so far.

The Critical Committee made a verbal report, but from lack of time to make out one that would do justice to the place, they asked to be allowed to produce a more extended one at the next meeting -granted.

The question was raised whether shading soil would earlied it. Not much faith was manifested in that kind of fertil zing. Dr. Howland stated that soil proteoted from the weather will generate nitrate of potasb, or

saltpeter, which tends to the decomposition of vecetable matter existing in the soil The question was asked, why so much complaint about core coming up this spring? There was an impression that it was caused by the severe winter injuring the germ of the corn but from various reports the trouble seemed to be

as much in the soil as seed; it was generally conceded that it was best to select seed from well matured crop in the fall.

The next meeting of the club will be held at K. K. Mason's on the 9th of July.

Critical Committee—L. Norman Gibbs, John

Ballenger and Walter Walton. The meeting then adjourned. W. GILLINGHAM, Sec'ly, pro tem,

to the citizens of Alexandria and vicinity. Office with his father, Dr. Wm. B. Klinstein, on Prince st , opposite the Postoffice. jel3-dt&2w A CARD—It should be generally known that the persons so unfortunate as to lose one or more of their teeth need not wait weeks and months for artificial substitutes and endure inconvenience, disagrecable changes in voice, facial expression. &c., but may have artificial teeth made before and inserted immediately after extraction of their natural teeth. By this mode a better adaptation, a more pleasant expression and a nearer approach toward preserving the natural harmony of the features are secured, and very much of the pain and difficulty experienced in learning to use teeth are also avoided. I have practiced this mode successfully for seven years, and baving introduced it here, would be glad to refer any one interested to pationts who know of it from experience. In treating the natural teeth my object is to preserve every one that time, petisace and modern methods of treatment can save. The use of araenic in destroping exposed nerves is condemned by the more enlightened of the dental profession on account of its turning teeth dark, inducing abseess and finally the loss of the teeth. The nerve pulp, which is the source of life to the tooth, should siways be treated, when exposed, with a view to its restoration to health. I use no cheap
